

## Analyst for the Analytical R&D and QC unit

At Protalix, our focus is to develop, produce and commercialize potentially better therapies for a variety of illnesses through cutting-edge research and development and our proprietary plant cell-based protein expression platform.

If you wish to be a part of our success and join a dynamic and professional team that allows personal and professional growth, we are looking for you.

We're looking for an Analyst for our Protein Chemistry and Glycobiology Laboratory.

### Responsibilities

- Optimization of analytical methods
- Analytical method validation and qualification studies
- Analyses on protein and large molecule products using different chromatographic analytical techniques, such as HPLC and LC-MS
- Batch release analysis and stability studies

### Requirements

- Preferred: Experience in operation with HPLC (Thermo, Waters).
- Preferred: Experience in chromatographic software: Chromeleon and Empower
- Preferred: An understanding of GMP (Good Manufacture Practice) regulatory guidelines
- Preferred: knowledge in method optimization and validation
- Essential: Computing skills, including use of spreadsheets (e.g. Word, Excel) and work with controlled laboratory documentation.
- Problem-solving savvy
- Self-motivated & strong interpersonal and communication skills
- Ability to work collaboratively as well as independently, with proven ability to form strong partnerships with key stakeholders
- Excellent communication skills – English and Hebrew

### Education

B.SC/M.SC
