

## QA Coordinator for the QA Systems and Laboratories Department

At Protalix, our focus is to develop, produce and commercialize potentially better therapies for a variety of illnesses through cutting-edge research and development and our proprietary plant cell-based protein expression platform.

If you wish to be a part of our success and join a dynamic and professional team that allows personal and professional growth, we are looking for you.

We're looking for a QA Coordinator.

### Responsibilities

- Providing quality assurance services to various laboratories, Engineering and Supply Chain departments.
- Review and Approval of Controlled documents (e.g Procedures, Work Sheets, Specifications, Protocols, Reports etc.)
- Auditing of raw data
- Performing Internal Audits
- Handling and approval of corrective and preventive actions and tasks
- Management of the documentation system

### Requirements

- Mandatory: Experience in the Life Science industry
- Preferred: Experience in the QA field
- Preferred: An understanding of GMP and/or GLP regulatory guidelines
- Strong interpersonal, communication and verbal skills – English and Hebrew
- Ability to work collaboratively as well as independently, with proven ability to form strong partnerships with key stakeholders
- Self-motivation, responsibility and learning ability
- Computing skills
- Problem-solving savvy

### Education

B.SC/M.SC
